

## **Reverse Engineering Report**

**Due: May 3, 2013**

Total report length should be two pages minimum, four pages maximum.

Times New Roman, 12 point font, single spaced, 1" margins all around.

Disassemble a floppy disk. Study each of the parts. With all the smart phones, you can take a picture of each part (front and back). If not, sketch the parts.

Name and label each part. Include a table with the part inventory, citing the figure where the part is shown (or including the picture/sketch in the table).

The report should include:

Header information (1%)

Your Name:

Part Sketches/Photos (24%)

Part Inventory Table (10%)

Describe each part (take about a paragraph per part). What is the part's function? (65%)
